As a premier regional medical center, WestVet Emergency and Specialty Center is staffed by highly-skilled board-certified specialists, veterinarians, and highly qualified certified technicians. We offer state-of-the-art medical equipment with continuous upgrades as technology advances. Many specialty treatments and procedures are complex and involve the attention of multiple skilled professionals. All of these advantages incur certain costs, over and above that of routine veterinary care.

Before treatment begins, our medical team will provide you with a recommended treatment plan and expense summary. Often, due to the unpredictable nature of some conditions, the course of treatment and outcome cannot be fully predicted. Treatment plans are simply estimates; charges may be lower or higher than anticipated—especially if there is a sudden or dramatic change in your pet’s condition. Once a treatment plan is agreed upon, as the owner, you will be asked to sign the estimate and make an initial payment. For extended hospitalization, you may be asked to make additional payments during the course of your pet’s stay.

If actual services needed exceed the treatment plan, we will make every effort to keep you informed of the additional care and cost during the treatment phase. In some cases, this may not be possible given the patient’s condition and need for immediate care. Please share all of your questions and concerns regarding costs with your doctor or technician before treatment begins. It is important that your medical team have a clear understanding of your wishes before any course of treatment is undertaken.

WestVet requires that your balance is paid in full at the time of your pet’s release. We are unable to offer any kind of payment plan or client credit accounts through our hospital. We accept cash, checks with a valid driver’s license, Visa, MasterCard, Discover and American Express. In addition, WestVet offers financing through CareCredit. With approved credit, this third-party finance company can offer extended payment plans, with little or no interest options, to help you pay for the care your pet may need. There is a $20.00 fee for all returned checks.

In any case, where an account is not paid in full, unpaid balances are subject to finance charges and monthly billing fees until the account is paid in full. Any account 30 days or more delinquent will be subject to collection action. Every attempt is made to have all charges on the invoice when your pet is discharged. However, if missed charges are found, we will contact you and invoice your account for these in a timely manner. We ask that missed charges be paid in full within 30 days of the original invoice date.

If you have any questions or concerns, or would like to apply for financing, please see a Client Care Specialist at the front desk.
