

WESTVET

Idaho's only 24-hour Animal Emergency & Specialty Center

WestVet is the only facility to offer specialty animal care services in the state of Idaho and surrounding region.

Advances in imaging technology have dramatically improved the diagnosis and treatment of serious diseases and injuries in pets. Radiology is an essential, non-invasive part of veterinary medicine. Likewise, an accurate interpretation of medical images is critical to effective treatment. We are pleased to offer the diagnostic services and expertise of two board-certified veterinary radiologists.
